WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/KR2004/001877

Bo	x No. I Basis of this opinion
1.	With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
	This opinion has been established on the basis of a translation from the original language into the following language, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
	Ruics 12.3 and 23.1(0)).
2.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
	a. type of material
	a sequence listing
	table(s) related to the sequence listing
	b. format of material
	in wirtten format
	in computer readable form
	c. time of filing/furnishing
	contained in the international application as filed.
	filed together with the international application in computer readable form.
	furnished subsequently to this Authority for the purposes of search.
3.	, , , , , , , , , , , , , , , , , , ,
	filed or furnished, the required statements that the information in the subsequent or additioanl copies is identical to that
	in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/KR2004/001877

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1.	Statement			
	Novelty (N)	Claims	1-3	YES
		Claims		NO NO
	Inventive step (IS)	Claims		YES
		Claims	1-3	NO
	Industrial applicability (IA)	Claims	1-3	YES
		Claims		NO

2. Citations and explanations:

Reference is made to the following document:

D: KR 2000-0009380 U (2000. 06. 05)

D relates to a ground finger apparatus of a shelf for electronic communication. A latch groove having a concave form is formed in a supporter and a latch part of an in/ejector is hung in a latch groove of a supporter. A printed circuit substrate evenly contacts to a supporter of a shelf. Forming ground of a printed circuit substrate at edge parts is a general technique. According to these components, electromagnetic wave generated from a printed circuit substrate is efficiently intercepted.

D discloses all of the features of Claims 1-3 of the present invention. Thus, the subject matter of Claims 1-3 does not involve an inventive step in the sense of Article 33(3) PCT.

The industrial applicability of Claims 1-10 is self-evident in the sense of Article 33(4) PCT.
